This could be during the week OR over the weekend and will always be agreed in advance. Additional rates for overtime and over nights to be discussed.***

**About the family:** SENNIIES are searching for a part-time Sennie to provide care for B8 and G2, three full days a week, with the opportunity for more hours over weekends. This is a busy family and so they require someone reliable and trustworthy who can come in and hit the ground running and build a loving bond with their 2 children. They are currently liaising with specialists and taking a positive and reward based approach with B8 who is ADHD and struggles with anxiety leading to behaviours that challenge, so someone who can work alongside the strategies already in place for him, whilst bringing their own ideas, is essential. Their youngest daughter will require the majority of

the care during the day, so someone who also loves toddlers and can support in early years development is a must.

**About B8:** B8 is a clever little boy who is very active and loves spending time outdoors and taking part in a variety of activities, including gardening. He's currently really into go-karting and goes driving a few times a week so a Sennie who can interact with his special interests is ideal.

B8 is diagnosed with ADHD which brings with it anxieties around various things on a day to day basis, this seems to be most directly associated with his 'executive functioning' meaning he struggles with completing tasks such as brushing his teeth and showering which can lead to 'demand avoidance' and if not handled effectively, verbal and physical outbursts. He needs guiding and disciplining in a calm and positive way rather than shouting and negative response as this tends to fuel the fire more and he continues to seek a response negatively. The family are currently using a reward chart for B8 and are trying to support and encourage B8 positively, they are looking for a Sennie who can continue this, but who can also ensure that clear and consistent boundaries are in place.

Both parents are active in picking him up on these behaviours and hope they can work alongside the Sennie to help him find coping strategies to help him regulate his emotions and better manage social situations.

B8 is finding mornings very difficult and so a Sennie who can help to make the morning routine less stressful and overwhelming for B8, to avoid potential triggers is needed to really help both him and the family.

B8 also needs support in developing his social and communication skills when it comes to responding to and engaging with others.

B8 is currently taking daily medication that appears to be working well for him.

**About G2:** G2 is an adorable, loving little girl who is lots of fun to look after. She loves animals and enjoys arts and crafts and playing on her trampoline.

G2 is currently typically developing, but it's important that the Sennie can still engage her in necessary developmental activities and encourage her with her letters, sounds, reading etc.

G2 may be attending nursery in the new school year however the family are keen to take whichever approach is best for her and so a Sennie with early years experience who can provide a stimulating environment for her would mean more chance of G2 remaining at home with the Sennie.

**About the role:** The selected Sennie will provide full day care on a sole-charge basis. Due to COVID-19 parents may be working from home, however the Sennie should behave as though this is a sole-charge position.

The Sennie should be flexible and happy and able to support the family when needed, with a fun approach and a strong understanding of how ADHD can affect a child. Light housekeeping / nursery duties are very much expected for this role, and so the Sennie should be comfortable with this. The Sennie should be capable of taking on board ideas and strategies as advised by the parents but also be able to bring their own insight and approaches to helping B8 with some of his areas for development.

**Main Duties include:**

- Help with the morning routine including breakfast, teeth brushing, getting dressed etc.

- School drop off and pick up
- Taking children to and from activities and clubs
- Meal preparation and dinner times
- Bath time routine
- Homework help
- Bedtime routine
- Supporting B8 and G2 in their key areas for development
- Occasional overnight stays on weekends sole charge
- Nursery duties associated with the children i.e: Children's laundry and ironing, tidying up toys/bedrooms, loading/unloading the dishwasher

The family are looking for a Special Educational Needs Nanny, who can provide fantastic and fun care for their child. The Sennie selected will be able to follow and support therapies and interventions determined by the family (in conjunction with the Sennie) and professionals. A genuine passion for working with children and special educational needs is a must.
